Illustrative example at t0
p0 = 192.0.2.0/24
aggregate origin AS-H
Future child origins
not yet enumerable
t0: choose
t1: child route appears
p = 192.0.2.128/25 from AS-D
t2: child ROA
available to ROV
ROV states during t1 to t2
Publish ROA for p0
p0, AS-H, maxLength=25
ROA active before t1
p0 / AS-H
Valid
covered
p / AS-D
Invalid
origin mismatch
Delay aggregate ROA
Aggregate ROA withheld
No other covering ROA
p0 / AS-H
NotFound
uncovered
p / AS-D
NotFound
no covering ROA
Missing conventional ROV outcome
Aggregate covered, later child distinct from Valid and Invalid
